connecting communities for life

### Bali, Indonesia

Goats can make a life-changing difference for families. Goats give milk to drink and meat to eat. Their poo can be used for fertiliser to help vegetables grow. Goats can also be bred to sell at the market. The income helps families to buy food, medicines and send their children to school.

### Papua New Guinea

Clean water saves lives! UnitingWorld partners run projects to bring clean water to remote communities. They also train community educators to teach people about good sanitation and hygiene, like handwashing.

connecting communities for life

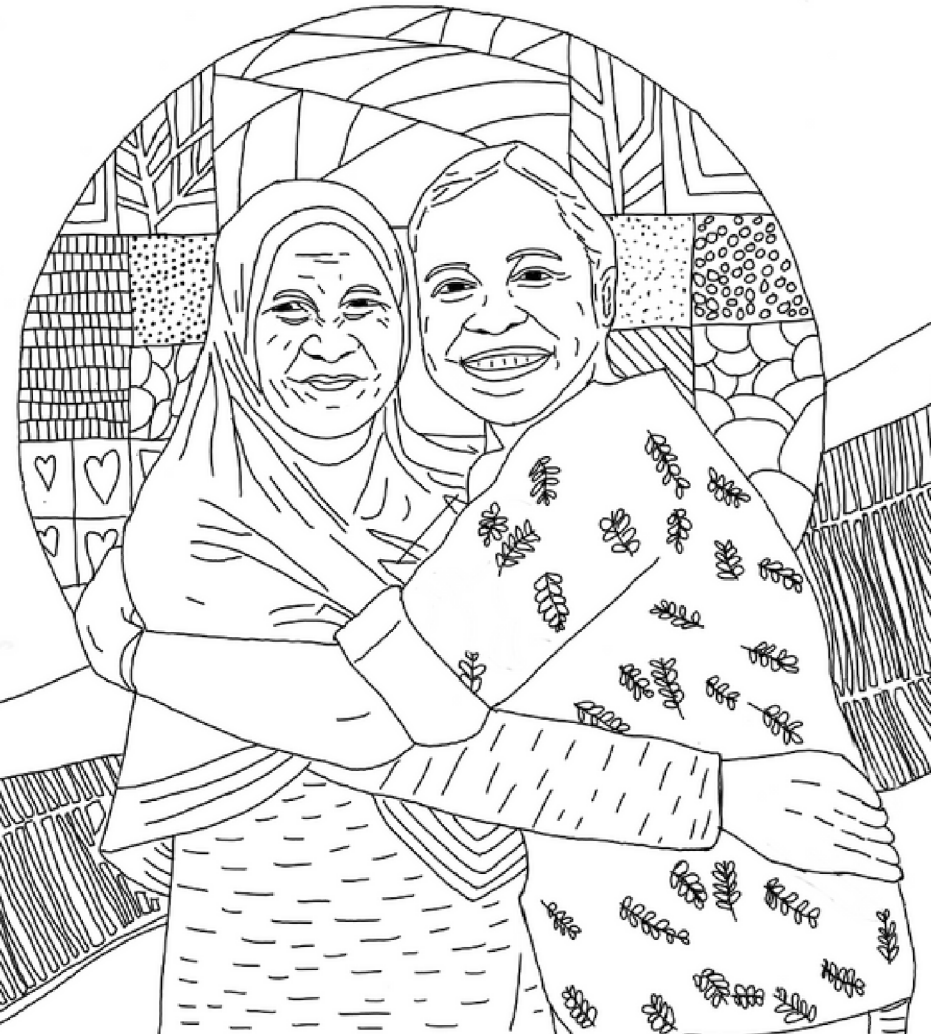

The Uniting Church in Australia is connected in partnership with churches across the Pacific, Asia and Africa. They are vibrant, inspiring, and dedicated people of God who are transforming lives and communities for the better. UnitingWorld Sunday helps us to connect to our global neighbours, learn from their stories and make a difference in the lives of those who need it most.

UNITINGWORLD

SUNDAY

A CELEBRATION OF

OUR GLOBAL NEIGHBOURS

connecting communities for life

### India

UnitingWorld partners help provide girls in remote areas with schooling, food, water and a supportive environment to set them up for life!

With the right support, girls can go on to have higher incomes, healthier families and become leaders in their communities.

### Make a fan!

Lots of places in the Pacific get very hot so people use fans to keep themselves cool, especially in church. Colour in the fan whatever colours you like, then cut it out around the outside line.

Fold the bottom section along the dotted lines towards the middle to make a handle.

If you need your fan to be stronger to keep you extra cool, you could glue it to some light cardboard.
